

My vision for myself...

In the next 10 years, I see myself to be a change maker, a midwife and a conservationist.

I want become a succesful agribusiness eterpreneur

I want to do my masters degree

I want to do my masters in environmental science and become an environmentalist.

I vision myself as a vegetable farmersI also have passion for designing buildings I vision the future an advocate for girls and children educator.

I want to get a fully funded masters scholarship right after my degree which is next year . after that i want to work in a minning company and i am working towards that

I want to to my degree and masters. I will like to own my own company or better still work in reputable companyone day

My vision is to be a philanthropist

My vision for myself...

I want to be an agricultural engineering. I want to play a significant role in the agriculture sector by ensuring the use of modern technology

I wanted to be a farm manger

In the next 5 years I want to become a Horticulturist

My vision for my community...

I want to set up a rice producing company in my community

A community free from plastic pollution, quality education and good roads

A community with less teenage pregnant

improve farmers livelihood through training them and also have agribusinesses to create job for the youths

To train my community members about environmental sanitation and the effect of an unclean environment on their lives and sustainable agriculture

In the next five years i want my community to have one of the biggest farming, and processing industry in Ghana

I want to help transform my community by educating everyone to help in keeping the environment clean to promote good health. I also want my community to be rich in unity.

I want the young ladies to be technically advanced

My vision for my community...

i want my community to have one of the biggest farming and processing industry in Ghana

As an agricultural engineer I want the rate of production in the field of agriculture should increase in my community

I want my community to be free from animal disease. I want that there should be veterinary services for the animal farm. also i will like that there will be health care facility in my community

To have a community where there are equal opportunities for both girls and boys, inclusive leadership where diversity is allowed, and a community that grows economically, socially and in a sustainable environment.

Sustainability community

to build 6 unit classroom for the community

My vision for Ghana...

A country with quality education, employment for all, quality roads, and no mining in our forest reserves, waters, and farmlands

create jobs and also empower youths especially girls through training and funding

In the next years to come, Ghana will be able to be the best international export of agriculture products

Ghana should be free from galamsey which is affecting our water bodies

my vision for Ghana is to have a smooth system which favours all gender especially for a girl child

Provide communities with electricity, good road network.

Provide job opportunities for the unemployed youth

Provision of quality education

My vision for Ghana...

I want that there should be peace in Ghana also job for the youth

In the next 10 to 15 years, I want Ghana import of food should decrease to its lowest

A country where there is equity, developing economically while being conscious about Environment protection.

I want that there will be more job for youth

to reduce post-harvest losses and become food producers

I hope Ghana is able to promote good mining practices to eliminate future health issues

My vision for Africa...

Reduce the effect of climate change in most African countries

i have to get ways to processing agricultural products to increase their shelf life because that's the biggest problem agriculture sector is facing. use agric waste products for something.

i want all africans to know the importance of given equal rights to every gender

With economic transformation, robust healthcare systems, women and girls enjoy equal opportunities in all spheres of life, environmental stewardship and education empowerment

Free travel between Africa countries

Proper education

I want Africans to put more effort on girl child education

Common currency for all Africa countries

My vision for Africa...

Peace and unity

Is there should peace in
africa

A continent where there is unity ,
sustainable development and
technological advancement to
make living easier and a healthy
environment for everyone
everywhere.

I want African to be very develop
like the western world so that we
can rise but most especially
African should make good use of
our natural resources.

sustainable agriculture
and food security

My vision for the world...

sustainability

vision for the world is to
maintain peace between us
so as to make life favourable

improve the livelihood of
farmers

Peace and unity

Economic equality

The world should be a
place where there is no
racism

The should be peace

Gender equality, economic
equity, technological
advancements, increased
cultural exchange, peace and
security, high-quality education,
universal health care, nations
unite to combat climate change.

My vision for the world...

A world where we work together to ensure inclusiveness, equality and also protect our environment

Nations unite to combat climate change, protect natural resources, and promote green technologies, ensuring a healthy environment for future generations.

climate change

I wish and hope that the world become very united to prevent all wars and conflict so that we can build together.

How important do you think female voices are in setting national policy to solve issues like health, food security, climate change, and poverty?

Statement 1

not important

very important

If I can contribute to national policy, what would my preferences be?
